Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM  
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Campbell.

There is disclosed in Johnson a seasoning apparatus comprising: a convex shaped cap 10; a plurality of prongs 13b attached to the cap; an a container (R) attached to the cap which acts as a handle and storage reservoir for seasoning material.

Campbell discloses a seasoning apparatus having a convex shaped head member 14; a plurality of convex shaped protrusions 16 attached to an outer surface of the head member; and a plurality of prongs 18, 20 attached to the convex shaped protrusions.

It would have been obvious to one skilled in the art to substitute the prongs of Johnson with the protrusions and prongs disclosed in Campbell, in order to improve the embedding function thereof.

In regards to the use of the container as a lid for a separate container, as recited in claim 2, such is intended use only and provides no structure to the claims. There has

not been positively recited in the claim a separate foodstuff container as part of the invention.

Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art as applied to claim 1 above, and further in view of Wu.

Wu discloses a container lid 22 having a spout 27 and connecting lip 20.

It would have been obvious to one skilled in the art to provide the container of Johnson, as modified by Campbell, with the lid disclosed in Wu, in order to seal material within the container.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Leon and Washington are cited for their disclosure of the state of the art.
